

# The Most Effective At-Home Device for Men's Bedroom Performance

Designed to emit 1 million pulses at therapeutic levels and capable of providing 50 total treatments with no lock-out time.

## Benefits Include:

- ✓ Maximizes blood flow
- ✓ Strengthens the "package"
- ✓ Increases sensitivity
- ✓ Decreases refractory time
- ✓ Eliminates the need for pills

Viagra® and Cialis® temporarily mask the symptoms of erectile dysfunction (ED), keeping you dependent on them forever while causing unwanted side-effects. The Phoenix Pro uses advanced acoustic waves to open up blood vessels within the penis while regenerating new blood vessels, which vastly improves erection quality.

## How It Works:

The Phoenix Pro emits 20k pulses of acoustic soundwaves into certain parts of the male member to optimize performance naturally. Combined with a specially created, custom-tailored protocol for each patient, the Phoenix Pro is able to expand blood vessels and stimulate the growth of new blood vessels in the penis.

This increases the blood flow to the penis and improves sexual function. In addition, the procedure activates the growth of new nerve tissue in the penis. This process, called angiogenesis, enhances sensitivity in the penis.

# Upgrade Your Erections From Home

The most powerful personal acoustic therapy device for men that optimizes erections in private and at home!

## Frequently asked questions

### **What is the Phoenix Pro?**

The Phoenix Pro model is the most effective physician-recommended at-home device designed to revitalize erections with the support and supervision of a certified physician. It offers patients the ability to accelerate the results of in-clinic treatments like the P-Shot®, [GAINSWave®](#), and more while affording them with the convenience of at-home therapy.

In addition, it is also a powerful standalone solution for those that are not receiving additional therapies from certified physicians.

### **What's the difference between the Phoenix and the Phoenix Pro?**

The Phoenix Pro emits more pulses per treatment (it's more powerful) and has no lockout, because it is intended to be used under medical guidance and supervision. It supports a wider range of medically supervised treatment protocols.

In addition to including medical support, the Phoenix Pro also includes an Accountability Journal so patients can track their progress, and is bundled with AFFIRM Performance Booster supplements which boost Nitric Oxide and enhances blood flow.

### **How does it work?**

The Phoenix Pro emits 20k pulses of acoustic soundwaves into certain parts of the male member to optimize performance naturally. Combined with a specially created, custom-tailored protocol for each patient, the Phoenix Pro is able to expand blood vessels and stimulate the growth of new blood vessels in the penis.

This increases the blood flow to the penis and improves sexual function. In addition, the procedure activates the growth of new nerve tissue in the penis. This process, called angiogenesis, enhances sensitivity in the penis.

### **When will I see results?**

Results vary on the level of erectile dysfunction that you're experiencing. Those with mild symptoms will enjoy results sooner than those with severe. That being said, most users experience noticeable results within the first 90 days.

**Does it hurt?**

People have varying levels of pain tolerance and many can perform the treatment with little discomfort. For those who are more sensitive, we provide and recommend the use of a topical numbing cream, and a sample is even included with the purchase of your Phoenix Pro. The majority of Pro users experience no pain at all.

**Will it make my penis bigger?**

Because acoustic therapy revitalizes the blood vessels within the penis and promotes the growth of additional vessels, the penis is able to be filled with more blood. Although this makes the penis look fuller and more robust, it does not change the actual length of the penis.

**How long does treatment take?**

Treatment is only 20 minutes. A licensed physician will create a custom treatment routine for you.

**How do I use the Phoenix Pro?**

Once you receive your device, you'll receive detailed protocols and instructions on how to use the device.

**Is this device legitimate?**

Yes. The Phoenix Pro is FDA- Recognized and follows the safe and proven protocols published in numerous acoustic study clinical studies. See Studies Here:
