- ✓ Maximizes blood flow
- ✓ Strengthens erections
- ✓ Increases sensitivity
- ✓ Decreases refractory time
- ✓ Eliminates the need for pills

HOW IT WORKS

This Phoenix Pro emits **20k pulses** of acoustics soundwaves per treatment to certain parts of the male member to optimize performance naturally.

Combined with a specially created, custom-tailored protocol the Phoenix Pro is able to break up plaque formation in blood vessels and stimulate the growth of new blood vessels in the penis.

This increases the blood flow to the penis and improves sexual function. In addition, the procedure activates the growth of new nerve tissue in the penis. This process, called neurogenesis. It enhances sensitivity in the penis and ultimately, sexual pleasure.

NBA Hall of Famer, Dennis Rodman, didn't believe how well **the Phoenix Pro** could work... until he started using it.

“ Everyone knows I'm a big fan of having sex. I've broken my penis three times – so that should tell you something. But now that I'm getting older, it's harder for me to get it up. I'm 60 years old, so it's normal. I've tried every kind of pill out there to get “it” up, but I hate those things cause they either don't work, or give me a headache after. When I heard about the Phoenix Pro, I didn't believe in it either. Now, I'm getting the same erections I used to get in my 20's and even more important, I'm able to keep up with my wife's sexual appetite. She doesn't know what's going on, but she likes it. Trust me guys. This thing works!
